DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2, 5-10 and 13-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 9 and 16, the primary reason for allowance is the combination of the limitations of an "input/output means", "acquisition means", "generation means", "first storage means", "direction detection means", "detection means", "determination means", and "display control means", which are not found singularly or in combination within the prior art. In addition to the recited combination of elements, claims 1 and 16 also contain "means plus function" language, where the references would need to contain the means as provided by the applicant per 35 U.S.C. 112, 6th paragraph.

The closest prior art references (Furuhashi et al. (US 6,583,771), Ogino et al. (US 6,593,902) and Brenner (US 6,870,518)) disclose of multiple display device systems in which a single image can be divided such that different portions of the image can be displayed on each display and thus the displays can be combined to form a large display system. The references, however, fail to teach of a direction determination means that assigns a value based upon a horizontal or vertical direction detected,

Art Unit: 2629

where the generation means generates the resolution information by cumulatively adding the resolution of the display unit with the resolution information acquired by the acquisition means in the direction that is detected by the direction detection means.

Furuhashi et al. comes the closest to teaching this limitation with the ID setting circuit 129, however, the ID numbers in Furuhashi et al. are not associated with a horizontal or vertical direction as claimed, but rather are assigned the value based upon the position within the serial connection of the display units. Thus, the closest available prior art references fail to teach, singularly or in combination, all of the limitations of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
